DETAILED ACTION

Reissue Applications

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Election/Restrictions

Newly submitted claims 23-38 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: these claims are method claims and the patented claims are to the product.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 23-38 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 39-48 are rejected under 35 U.S.C. 102(b) as being anticipated by
Matsumoto US 5,110,763.

Art Unit: 2822

Matsumoto disclose a semiconductor structure including a substrate (43), a first layer of spin-on glass (41) disposed on the substrate, a first dielectric (46) disposed on the first layer, and a planarized second layer of spin-on glass (47) disposed on the first dielectric. Also, Matsumoto teaches the use of various materials to form the layers and that there may be other layers on the substrate between the substrate and the first spin-on glass layer (see figs. 3A-F and related text).
